

# Summary

Addons are used to sell additional services which are not linked to stock. Set unique SKUs for reporting, control pricing centrally, and optionally choose to raise purchase orders. Perfect for gift wrap, removal and assembly services, extended warranties or third party insurance policies.

The may be assigned to [Products](#).

## Key to icons

 = edit or type unknown

# Setup

## Addon Group

To create new Addons, you must first set up a new Addon Group. These act as a title for your Addon.

Field	Purpose
Name	<i>This is the name of the group, and is displayed to the customer</i>
Description	<i>This is intended to be a short description, which is displayed to the customer; this should be generic to all Addons within this Group</i>

## Item Addons

These are assigned on a 1:1 basis against products. Examples include gift wrap, disposal services and other similar services.

Click [here](#) for more information.

# Group Addons

These are assigned per Product, but the price of the Addon is determined by the contents of the basket.

Click [here](#) for more information.

## FAQs

### Is it possible to disable an Addon without deleting it?

Yes - this is done via individual Addons, and can not be done at the Addon Group level.
