Variants

A Variant is a version of a [Product](#), which can be managed from the [Inventory](#) tab. These will be separated by [Variant Options](#), and those distinctions are made in pricing or stock, e.g.

- Size
- Colour
- Fabric Grade

A Variant may be linked to multiple [Unique Stock Records](#).

Each Variant on a product may be given:

- Specific pricing
- Specific stock
- Specific dimensions
- Specific product imagery
- Specific [Customisations](#)
- Specific [Upsells](#)
- Specific [Addons](#)

Other features around the site also link to Variants, including [Promotions](#), [Reporting](#), [Order Fulfilment](#), etc.

Unique Stock Records

A Unique Stock Record is a sub Variant; it is a Variant to which Customisations have been applied.

It will inherit all characteristics of the parent Variant, except that it will also show the linked Customisations.

These may be used just for [Stock Management](#) and order fulfilment, or as a way of listing specific products for sale.

These are managed via the [Inventory](#) tab, and may either be created there, or when a product with [Customisations](#) is added to a [Purchase Order](#).
