Booking

This tab is used to manage the Booking product type.

> To manage Bookings, this product must be set as a 'Booking' on the Product tab

Setup

A booking product may be setup with multiple Variants, in which case you will need to add Variant Options.

Field	Purpose
Days ahead visible	*This sets how far in advance a customer may make a Booking*
Max per basket	*The maximum number of this Variant permitted in a basket* *Leave this to 0 for no limit* *Defaults to 0*
Customer note name	*Use this to add a requirement for a customer note; the text entered here will act as a customer prompt* *If left blank, the customer will not be asked to leave a note*
Capacity	*This is set against each individual timeslot*

Time Slots

Use these controls to set repeating time slots which are available to be booked.

It is also possible to insert specific date/time slots, which will act in addition to the default timeslots.

Inventory Tab

Please be aware that there will be additional fields on the Inventory tab if you are editing a Booking product. These will have to be managed appropriately.
