Summary

The EPoS is designed to work alongside a Hardware integration. For more information on that, click [here](#).

Order Management

This is the default view.

Within the POS, users can:

- create and search for Sales Orders
- create and search for Customers
- search for products
- navigate categories
- view stock levels
- view item upsells

Voucher Balance

This section may be used to review voucher balance.

Performance Report

Within this section, users can review their daily and weekly performance against targets set in [Site Settings](#).

End of Day

This section may be used to record end of day takings; it is an essential part of the cashing up process.

Adding a New Sales Order in the EPoS

Adding a Customer to a Sales Order in the EPoS

When raising an order in the EPoS, you can choose to add a new customer by entering their details manually, or you can search for an existing customer that is already registered with you.

New Customer

You can enter new customer details to a new order in the EPoS by simply clicking "Add Customer". Once you have done this you will be able to add the following details;

- Title, first name and surname.
- Address, postcode and country.
- "Where did you hear about us?"
- Contact details including Email address, telephone number and alternate telephone number.

Contact preferences for the customer can be updated using the "Contact Preferences" button under the email address.

Contact details

testcustomer@iconography.co.uk

Contact Preferences

Within the contact preferences you can select which public and private mailing groups to add them to (these will be pulled from the [Manage Groups](#) screen).

Edit contact preferences

Public mailing groups:

Newsletter

Special Offers

Private mailing groups:

Gold Customers

Private VIP group

Close

Once you are happy that the details have been entered correctly, click "Update".

Existing Customer

1. Click "Create New Order"

Image not found or type unknown

2. Click "Add Customer"

Image not found or type unknown

3. You can search for an existing customer using their surname, postcode, email or loyalty code.

Image not found or type unknown

4. Click search to return matching results.

Image not found or type unknown

5. Click "add" when you have found the appropriate customer.

Image not found or type unknown

6. The customer, along with all of their contact details, has been added to the order successfully.

Image not found or type unknown

7. You can choose to amend or add missing details manually if required.

Adding a Product to a Sales Order in the EPoS

There are three methods of searching for, and ultimately adding, products to an order in the EPoS;

1. Search field.
2. Browse Products.
3. Barcode scanners.

Search Field

You can easily search for a product by entering an appropriate term or SKU in to the "Search Products" field. This will return suggested results as you type, or you can hit return to see all of the results.

Browse Products

Under "Browse Products" you will be able to browse through your categories (listed in blue boxes), just as a customer would on the front end of your site. From here you can enter the appropriate categories and sub-categories to find the appropriate product that the customer wishes to purchase.

You can browse through categories by hovering over "Browse" in the EPoS navigation bar at the top. This is essentially the same as browsing using the blue category boxes.

Barcode Scanners

If you have barcode scanners, these will allow you to scan the product that the customer wishes to purchase, which will automatically add the product to the order, without having to search for it.

Adding a Product

1. Choose the category you wish to search in.

Image not found or type unknown

2. Choose the sub-category you wish to search in.

Image not found or type unknown

3. You may wish to search within further sub-categories, or you can simply add click "ADD" on a product within the chosen category.

Image not found or type unknown

4. From here you will be able to select the from the available variants, as well as any Unique Stock Records (USR) that are currently available from stock.

Image not found or type unknown

5. Selecting a variant will allow you to proceed to choose from the available options.

Image not found or type unknown

6. The final step will be to add any custom options. If no custom options are required, click "add".

Image not found or type unknown

7. The product has now been successfully added to the order.

Image not found or type unknown

Product availability is detailed within the EPoS. For a full explanation of this terminology, please click [here](#).

Pineapple (standard variants)

ADD

Adding Add Ons to a Sales Order in the EPoS

If a product has addons assigned to it within the CMS, these can be selected as part of the ordering process within the EPOS.

1. Click "ADD" on the appropriate product when in an order in the EPoS.

2. If there are multiple variants available you will see a popup where you can select the appropriate variant.

Image not found or type unknown

3. If the product has addons set up, these will be listed as the next step in the popup.

Image not found or type unknown

Tip: If ordering a standard product, addons are chosen in the next step. If ordering a made to order product, the addon will be one of the final steps after selecting made to order options.

4. Clicking the drop-down arrow will present all available addons, as they have been set up in the CMS.

Image not found or type unknown

5. After selecting the appropriate addon, you will be presented with the addon description, as set up in the CMS. Click "Continue" to add the product and addon to the order.

Image not found or type unknown

6. Both the product and addon have now been added to the order.

Image not found or type unknown

7. The addon can be amended by clicking on it - it can be cancelled or have VAT removed.

Adding a Discount to a Sales Order in the EPoS

1. Once a product has been added to an order, a discount can be added by clicking "Apply Discount".

Image not found or type unknown

2. There are two discount options available; promo code (if there is one available from your promotions) and custom discount.

Image not found or type unknown

3. If adding a custom discount, a reason must be entered. You can choose from Staff Discount, Goodwill, Damaged or Other.

Image not found or type unknown

4. You can also select if you would like to apply the discount from the overall goods total, or from a specific product on the order. In this instance, we're going to apply a discount to the whole order.

Image not found or type unknown

5. The next step is to choose the method of discount. You can discount be a specific amount, by a percentage or set to a specific price.

Image not found or type unknown

6. Once you have selected the method of discount, you will need to enter the amount you wish to discount by, or the specific price you would like to set the product to. As we are discounting by a percentage in this example, I'm going to type "10" to apply a 10% discount.

Image not found or type unknown

7. To apply the discount, an authorisation (Auth) pin will be required.

Image not found or type unknown

8. If the Auth PIN was correct, the discount will be applied and you will receive a "Success" message.

Image not found or type unknown

Adding Delivery to a Sales Order in the EPoS

1. Delivery can be added to an order by clicking "Add Delivery".

Image not found or type unknown

2. From here you can select the appropriate delivery method. All available delivery methods (Postage Types) will be displayed.

Image not found or type unknown

3. If the customer is not walking away with the product(s), and the product does not need to be ordered in, you can book the delivery.

Image not found or type unknown

4. Clicking "Book Delivery" will open up a scheduler popup. In here you can select the appropriate products that you wish to book the delivery for, as well as the date, lorry and timeslot.

Image not found or type unknown

5. You can manually enter a delivery cost.

Image not found or type unknown

6. However, you can also choose to "Auto-Recalculate" delivery, which will automatically calculate the delivery cost, depending on the delivery address and delivery method (postage type) chosen.

Image not found or type unknown

7. You may wish to enter delivery instructions. For example, there may be tricky access which the delivery drivers need to know about.

Image not found or type unknown

8. Once you're happy that the delivery information has been entered correctly, hit "Update".

Image not found or type unknown

9. Delivery has now been applied to the order.

Adding a New Sales Order in the EPoS

Adding a Payment to a Sales Order in the EPoS

Voucher Balance

This screen can be used to do a quick lookup of a [Voucher](#)'s value, on behalf of a [Customer](#).

Enter or scan the barcode of a gift voucher into this box.

Voucher Balance

SAP3DAMETTTNUBSV

check

This will display a value and an expiry date.

Balance: £10.00

Expires: 24/02/2026 12:20

Performance Report

This screen can be used to review a User's performance.

This report is a weekly performance report, benchmarked against the Weekly Sales Target set against each [User](#).

Performance Report

| | | |
|----------------------------------|------------------------------------|----------------------------------|
| Your Performance | | |
| items sold this week: £856.00 | items sold last week: £5,006.09 | your weekly target: £5,000.00 |

End of Day

This is used to cash up a Store at the end of the day.

Data may be retroactively logged by using the drop down at the top of the screen.

Each payment type that was taken on that day will be displayed, along with a box to enter that day's takings. The User should enter the amount as counted, and that will be recorded.

End of Day TODAY

Please enter the below amounts for UK Warehouse.

Payment Type

| | |
|------|---------------------|
| card | Amount in till: 500 |
|------|---------------------|

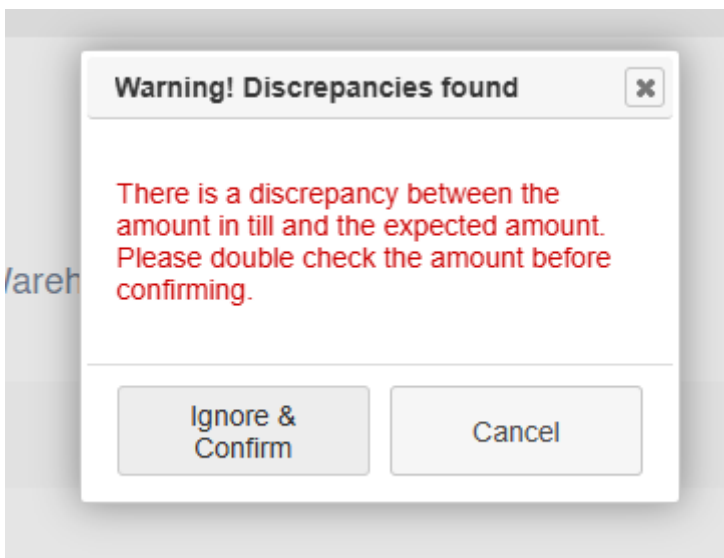

[Commit End of Day](#)

Integrated payment types, such as Elavon Retail Cloud, will not appear on this list, as they are automatically accounted for.

This data can later be viewed on the [Till Discrepancies](#) report.

Discrepancies

In the event of a discrepancy, a warning will be shown and the user will be given the option to review the data entered.

Additional Information

Other utilities and minor function within the EPoS

Complete Sale

This button can affect Stock Levels, and users should be aware of this prior to use

If pressed, the Complete Sale button will:

- mark all items on the order as despatched, regardless of stock availability
- close the order
- print a receipt (if a [Hardware Integration](#) exists)

| | | |
|--|------------------|-------------------------------|

|  Add Delivery | (+) | |

Complete Sale

Criteria for Display

The Complete Sale button will only display under certain criteria:

- the item is a 'Collection' order, meaning that delivery has not been configured
- the order is fully paid

It will not show if:

- an order is marked for delivery

Warning

If a user attempts to use the Complete Sale button, and not all items have available stock, a warning will be displayed.

If the user presses 'Despatch Now', stock will be automatically created to fulfil the order.

Improper use can cause stock levels to be artificially inflated

'Save for later' will cancel the process and close the pop up without completing the sale.
