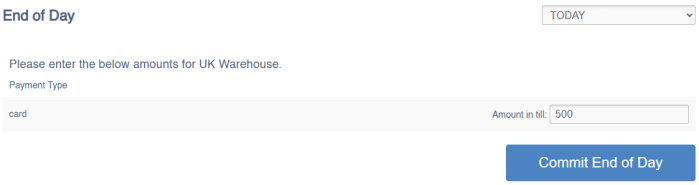
End of Day

This is used to cash up a Store at the end of the day.

> Data may be retroactively logged by using the drop down at the top of the screen.

Each payment type that was taken on that day will be displayed, along with a box to enter that day's takings. The User should enter the amount as counted, and that will be recorded.



> Integrated payment types, such as Elavon Retail Cloud, will not appear on this list, as they are automatically accounted for.

This data can later be viewed on the Till Discrepancies report.

Discrepancies

In the event of a discrepancy, a warning will be shown and the user will be given the option to review the data entered.
