Enable Two Factor Authentication (2FA)

This is a recommended setting for enhanced security. This is done through the Google Authenticator application for both Android and iOS. Simply enable this and follow the steps on screen to setup 2FA.

This can be cancelled at any time.

Step 1:

[Download Android App](#) or [Download iPhone/iPad App](#)

Step 2:

Click 'add' and then 'scan QR code'

Step 3:

Scan the QR code below:

Step 4:

Enter the Two Factor Authentication (2FA) code shown and click confirm below:

Confirm Two Factor Authentication (2FA) code

Cancel/Disable Two Factor Authentication (2FA)
