Price Labels

Add custom price labels to products.

- Summary

Summary

Price labels allow the user to control the appearance of pricing on the eCommerce website, and within the POS.

Setup

When adding a new price label, or editing an existing one, simply enter a Label Name. This doubles as the Price Label description, and as the text that will be shown to the customer.

Use the colour picker to select a colour; this will be used as the text colour.

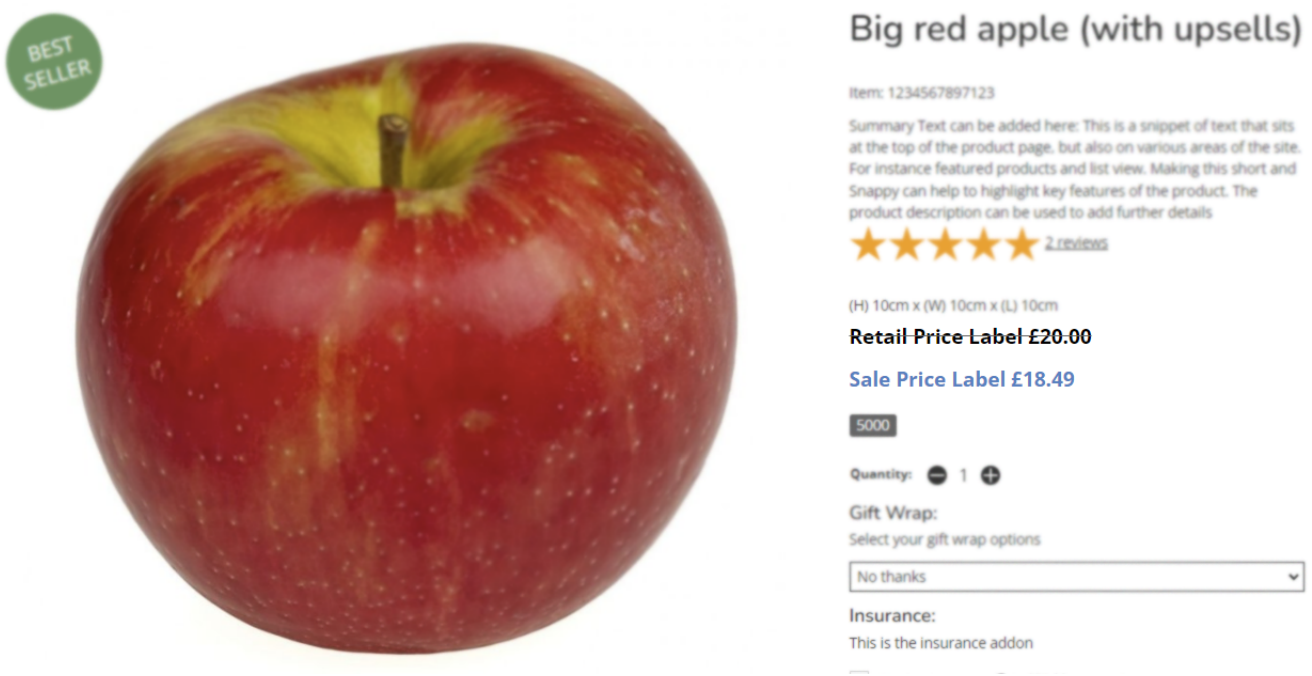

Assigning a Price Label

Price Labels are assigned at the Brand level, or to individual Products.

How will it appear?

Price Labels will show within the POS, as well as on your website. These will show on the Product Listing Pages, as well as on the Product Detail Page.

An example of an IXO Commerce website is below:

FAQs

How do I set up a Product with a custom Price Label?

Price Labels are always assigned as part of setting up your Brands; all products within a Brand will show the same Price Label.
