## Custom Rank (A/B/C)

Use the sliders to create Custom Ranks for managing Product sort order. These are then applied to individual [Category](#) pages.

Field	Purpose
Custom name (for reference only)	For reference only
Custom sort order (by activity)	Boost the Product in the sort order if it has a higher activity, appears in searches, number of visits to Product Detail Pages, number of times added to basket, etc.
Custom sort order (by best selling)	Boost the Product in the sort order if it is best selling, e.g. the higher in your best seller rank it is, the larger boost it will get
Custom sort order (by biggest savings)	Boost the Product in the sort order if it is on sale, e.g. the larger the savings, the bigger the boost it will get
Custom sort order (by featured)	Boost the Product in the sort order if it is featured (featured/home/checkout) on the <a href="#">Product</a> tab
Custom sort order (by lowest price)	Boost the Product in the sort order based on price, e.g. lower priced products get a larger boost

Field	Purpose
Custom sort order (by newness)	Boost the Product in the sort order if it is new, e.g. the newer the product, the bigger the boost it will get
Custom sort order (by stock)	Boost the Product in the sort order if it is new, e.g. the more stock you have, the bigger the boost it will get
Custom sort order (by margin)	Boost the Product in the sort order if it is new, e.g. the higher the margin on the product, the bigger the boost it will get
