

Summary

This screen shows a list of all required Stock Transfers, as well as producing a shortcut to their creation.

Simply filter to the appropriate source/destination store, then select the lines that you wish to transfer; the confirmation button is at the bottom of the screen.

This will create a single Stock Transfer for each combination of source and destination Store.

What is a required Stock Transfer?

A requirement exists if there is a reason to transfer stock. Reasons include:

- A Customer has requested to Collect their Sales Order from a specific Store, but the stock is held elsewhere
- The Stock required for an eCommerce Sales Order exists within the system, but is in a Store that is not 'enabled for web fulfilment'
